

PRESS RELEASE

30.11.2020

Tareno Global Water Solutions Fund awarded with FNG label for the third time

The Tareno Global Water Solutions Fund has successfully weathered the turbulence in the financial markets this year and achieved a performance of +5.8% YTD. For the third time in a row, it was certified with the FNG label and received two out of three stars.

The fund volume has now increased to over EUR 140 million. The next step will be the launch of a new impact share class in January 2021, in which part of the management fee will flow into charitable water-related projects.

**Tareno Global Water Solutions Fund - An investment for the future**

The boutique fund is a pioneer in the investment theme of water. Since 2007, it has focused on improving water supply and quality. The thematic fund has a unique investment universe and a consistent and innovative investment process that places high demands on companies in terms of quality and sustainability. It thus meets the internationally recognized quality criteria of Eurosif.

Due to inevitable global megatrends - such as population growth, climate change, urbanization and technological change - there is a huge potential demand for water companies. The above-average predictability of future returns means long-term, attractive investment opportunities for investors that are likely to last for decades.

Sustainable Investment Forum - FNG

With the FNG label, the Sustainable Investment Forum aims to ensure the development and ongoing improvement of quality standards for sustainable investment products. The label is awarded by QNG ("Gesellschaft für Qualitätssicherung Nachhaltiger Geldanlagen GmbH") in cooperation with the University of Hamburg and has now established itself as the quality standard for sustainable funds in the German-speaking world. Thanks to the holistic approach, even individually different sustainability approaches can be examined and compared. Two years ago, the Tareno Global Water Solutions Fund was the first water fund to be awarded the prestigious FNG label.

Tareno Ltd

Tareno Ltd was founded in 2000 as a public limited company and is owned by private shareholders. With over thirty employees and CHF 2.5 billion in assets under management, it is one of the largest independent asset management companies in Switzerland. With a representative office in Zurich and a subsidiary in Luxembourg, Tareno is present in important financial centers in Switzerland and Europe. Tareno Ltd is directly regulated by the FINMA (Swiss Financial Market Supervisory Authority) and was awarded the title of Best Asset Manager in Switzerland 2020 by the "Bilanz".

Contact

In June 2020, Sybille Wyss took over the role of CEO at Tareno Ltd. The graduate in business economics is thus one of the few women at the head of a large independent asset manager. From 2012 to 2020, Sybille Wyss was Chief Investment Officer of Tareno Ltd and built up the portfolio management and asset management division. She has managed the Tareno Global Water Solutions Fund as Co-Fund Manager since the fund was launched in 2007 and as Fund Manager since September 2018.
