

The Singularity Fund is a long-only global, all-sector equity UCITS (Lux) fund with daily liquidity that tracks the Singularity Index™ (SI, Bloomberg: NQ2045) a proprietary index based on a unique methodology that captures exponential innovation globally. Companies from all conventional sectors and industries are weighted according to their Singularity Score, a metric that measures companies degree of applied innovation. This results in a high level of diversification beyond the technology sector and beyond typical benchmarks.

Singularity meets ESG: The investment methodology applies norms-based screening and removes companies that allegedly severely violate national or international laws, regulations, and commonly accepted global norms according to MSCI ESG Research. Furthermore, firms are excluded based on their involvement in controversial business areas such as weapons, cluster bombs, landmines, and thermal coal.
